Bluebirds Newsletter - Autumn Term 2

WELCOME

We hope you've all enjoyed a wonderful break. This term is always packed with activity and excitement, and there will be plenty of engaging new learning opportunities to explore! As we move into the colder winter months, please remember to send your child in with a coat every day. We'll continue to make the most of outdoor learning whenever we can.

Miss Thompson and Mrs Spencer.

Reading books

Research shows that practice, practice and more practice is the best way to become a fluent reader. This includes reading and rereading the same text multiple times until it becomes effortless for the child. To support your child, please ensure they have their phonics reading books and red record book in school every day, and please listen to them read their book at home daily.

Spelling and Grammar

To support our children to become better spellers, last year, we invested as a school in 'Spelling Shed'. Alongside learning to read and spell in our phonics and writing lessons, we will have different spelling words and patterns to focus on in class each week. In addition, I will set games for the children to play at home as a fun way of practicing. A sticker with their login details can be found inside their red reading record book. The games are quick and fun, and it will be great to see the impact regular practice can have on their spelling knowledge. Login frequently to play the games and we will celebrate their progress in class.

How to contact me

If you have any worries and would like to speak to me, please contact the school by phone or email, or you can email me directly on bluebirds@egerton.kent.sch.uk and I will endeavour to get back to you as soon as possible.

Thank you, Miss Thompson

This term's topic - 'Remember, Remember'

History leads the topic this term, as we will be finding out about World War 1, where it took place and what life was like for soldiers in the trenches. Having learnt about poppies through art last term, we will now consider the link between poppies and Remembrance.

In addition, we will be using sewing and other joining techniques to make our own glove puppets through our DT project, carrying out investigations about suitability of materials in Science and creating music using instruments and our voices for performing. Finally, we put our singing voices to full use in this year's KS1 Nativity!

RE

This term, we are focusing on a universal topic (one which incorporates the ideas and thinking from many perspectives, both religious and non-religious). We will consider the big question '**How should we care for others and why does it matter?**'

Important...

Please send your child in with a **named water bottle** every day, along with a **coat** - we cannot always predict the rain! Gloves, hats and scarves for cold weather also need to be named. Fresh, healthy snacks are provided each day by school for break. Alternatively, you can provide fruit or vegetables from home, yogurt or a cereal bar. No nut products and no sweets or chocolates, please.

Screen time research

Research shows excessive (over 2 hours a day/evening) screen time can negatively impact children's social-emotional development, language skills, and physical health, with links to anxiety, depression, aggression, and obesity.

Conversely, limited educational screen use can have benefits. The type of screen content matters, as gaming is associated with higher risks than educational content.

Risks of excessive screen time

Social and emotional problems: Increased screen time is linked to higher rates of anxiety, depression, aggression, and hyperactivity.

Developmental delays: Excessive use can interfere with language development and negatively affect executive functions like emotional control and focus.

Physical health issues: Excessive screen time is associated with an increased risk of obesity due to sedentary behaviour and unhealthy eating habits while viewing, and can contribute to sleep disorders.

A vicious cycle: Children with existing socioemotional problems may turn to screens as a coping mechanism, potentially creating a cycle of increased use and worsening problems.

Moderating factors and positive strategies

Content matters: Gaming, especially certain types of games, is linked to higher risks compared to educational or recreational screen use.

Parental involvement: Set clear screen time limits and boundaries.

Engage with children's screen activities, such as co-viewing, to help them understand the content and model good screen habits yourself.

Age-specific guidance: Older children can benefit from limited, educational use, but the balance with other activities is still crucial.
